

North West Region of British Cycling
Chairman's Report 2017

This year is my 15th year as Chairman.

The region is in a reasonable position financially.

Our riders are some of the strongest in the country.

This also applies to our up and coming young male and female riders

This due to the commitment of the coaches and officials

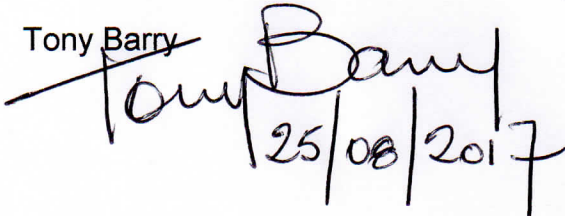

The racing calendar this year has been full however there is still room to organise some new events.

The road, Track and Mountain Biking events are well organised and is a credit to the organisers and the many volunteers.

Our committee is a credit to the standards that the region sets to British Cycling and we have maintained our position as the 3rd largest region in the UK being even larger than Wales and Scotland combined.

I sincerely hope that the change to our Regional Board will assist to improve our standards and I can only say a huge thank you to you all for that commitment

Tony Barry
